PHILIPS

IPL hair removal system

For use on body 22 minutes to treat lower legs, Lifetime >100,000 light pulses, Compact corded design

SC1981/50

Highlights

Enjoy smooth skin every day

Philips Lumea applies gentle pulses of light to the hair root. This results in the hair shedding naturally and hair regrowth is inhibited. Repeating this treatment regularly will keep your skin smooth everyday.

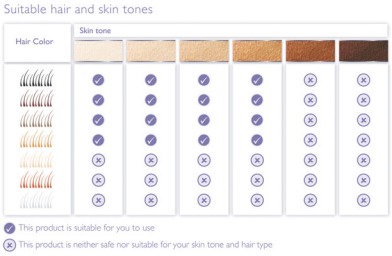
Effortlessly effective

Our clinical studies have shown up to 75% hair reduction after only two months (or four treatments) resulting in smooth hair free skin. To maintain these results, simply repeat the treatment when needed. Time between treatments may vary based on your individual hair regrowth.

IPL technology

Philips Lumea Comfort uses an innovative light-based technology called IPL (Intense Pulsed Light), derived from the technology used in professional beauty salons. Philips has adapted this technology for effective use in the comfort of your own home. Philips worked closely with skin care experts to develop this technology. For more than 10 years Philips carried out extensive consumer research on IPL technology with more than 2000 women.

Suitable hair and skin types



Suitable hair and skin tones
Hair Color
Skin tone
This product is suitable for you to use
This product is neither safe nor suitable for your skin tone and hair type

Philips Lumea Comfort IPL Hair Removal System works effectively on (naturally) dark blonde, brown and black hairs. As with other light-based treatments, Lumea Comfort IPL Hair Removal System is NOT effective on red, light-blonde or white/grey hair.

Application areas

Use with confidence to remove hair on the body including legs, arm pits, bikini area, belly and arms.

5 light energy settings

Philips Lumea IPL Hair Removal System has five adjustable light energy settings to ensure gentle but effective treatment. Used correctly, Philips Lumea's IPL treatment is comfortable and gentle to use even on sensitive skin and sensitive body areas.

Skin Tone Sensor

The unique Skin Color Sensor measure the treated skin complexion at the beginning of each session and occasionally during the session. If it detects a skin tone that is too dark for Lumea Comfort, it will automatically stop emitting pulses.

Slide and Flash mode

Lumea Comfort IPL Hair Removal System enables a sliding motion for a more convenient and continuous application.

No replacement parts needed

Philips Lumea Comfort IPL Hair Removal System is a complete solution that comes ready to work straight out of the box. More importantly, it does not require any replacement lamps, providing 6 years of full body treatments with no extra cost.
